DEVICE SERVICES

Device Services for Electronic, Mechanical, and Mechatronic Devices and Systems

Maintenance, Repair, Calibration, and Spare Parts

Our device services help companies worldwide maintain, repair, calibrate, and source spare parts for optical-fiber and electronic systems. As a certified Corning Level A partner and an experienced service provider for third-party products, we deliver technical services.

We support you in the following areas:

Service Center for Corning Fiber-Optic Devices
spare parts and consumables for Corning cleavers and splicers directly from the manufacturer

Contract Service Provider
maintenance, repair, refurbishment, calibration, and spare-parts supply for third-party products

Systems Partner for Resource-Efficient Logistics Solutions
efficient logistics solutions for end-customer products, products, assemblies, and individual work packages across the full contract-manufacturing and outsourced-production chain, including interplant transportation

Manufacturing Partner for Electronic, Mechatronic, and Mechanical Devices

From Prototype to Series Production
Innovative and Reliable for 20 Years

WELCOME TO WALO

We are your Manufacturing Partner in Device and Machinery Manufacturing

Extensive Manufacturing Capabilities and Specialized Expertise

Our portfolio ranges from manufacturing Corning optical-fiber tools to contract equipment manufacturing. We also produce turned, milled, and sheet-metal parts.

As a manufacturing and development partner, we support companies from individual components to production-ready products. Our customers benefit from coordinated processes and extensive in-house manufacturing capabilities. They also benefit from a strong network of specialized manufacturing partners.

Our Products and Services

- Corning Products for Optical Fiber Technology
- Device Manufacturing / Module Assembly / EMS
- Turned, Milled, Sheet-Metal, and Mechanical Parts
- Product Development

Device Manufacturing and Assembly

We provide contract manufacturing for equipment and assemblies, from prototype builds through series production.

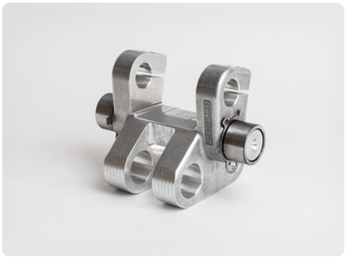

Turned, Milled, Sheet-Metal, and Mechanical Parts

We manufacture and supply turned parts, milled parts, sheet-metal components, and mechanical parts for mechanical and device engineering – precise, reliable, and made in Bavaria.

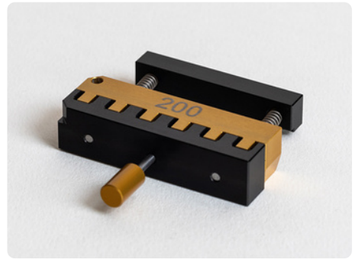

Corning Products for Optical Fiber Technology

We manufacture our own portfolio of Corning products for optical fiber technologies, including fiber cleavers, fusion splicers, and accessories.

Product Development

We guide your product from the initial idea to series production readiness – with design, prototyping, and development expertise backed by over 20 years of experience.
